## **Precision Machining for Simple to Complex Products**

Snoe Inc., Machining and Welding is a contract machine shop that produces simple to complex precision machined projects for commercial and industrial clients as well as local, state, and federal government agencies. Our shops have a wide range of CNC milling and turning capacity which allows us to take on projects ranging from small intricate parts to large, heavy-duty components and assemblies.

Snoe, Inc. consistently meets or exceeds rigorous customer specifications and requirements in the most cost-efficient manner possible. The top-quality products produced by Snoe Inc., located in Caldwell, Texas, are attributed to our well-trained employees who have years of experience working with the most precision-based machinery on the market, which includes:

- Coordinate Measuring Machine (CMM)
- Horizontal Machining Centers (HMC)
- CNC Vertical Boring Machines/ Vertical Turning Lathes (VBM/VTL)
- Vertical Machining Centers (VMC)
- Horizontal Boring Machines (HBM)
- Computer Numerical Control Lathes (CNC)

Since 1979, we have served diverse industries such as aerospace, automotive, aviation, oil and gas and defense. Working with a variety of metals ensures versatility and adaptability to meet the specific product requirements of every client.

### **Quality Assurance**

Our advanced Coordinate Measuring Machine (CMM) guarantees that every component we deliver meets the highest standards of precision and quality.

Rigorous quality control processes are embedded in our workflow, providing you with the confidence that our parts and components perform flawlessly.

## AS9100D and ISO 9001:2015 Certifications

The top-quality products produced are a result of our culture that focuses on safety, experienced and well-trained employees, quality work, processes and an integrity-based business model. It is this culture that sets us apart from others in our industry.

To support our culture of quality, we have achieved and maintain **AS9100D (aerospace) and ISO 9001:2015 certifications, certificate number C2021-05108.**

## JCP Certification

JCP certification allows us to access and properly control DOD and Canadian Department of National Defense unclassified, export-controlled information and technical data (CUI).

**Our JCP certification number is 0088859 and expires May 03, 2029.**

## DDTC Registration Code M49837

Snoe, Inc. is registered with the Department of State's Directorate of Defense Trade Controls (DDTC) to manufacture defense articles. Our **DDTC Registration Code is M49837 and expires June 30, 2025.**

Our dedication to quality, processes, and integrity-based business model sets us apart in the machining industry.

## Our CNC Machining Services

At Snoe Inc., Machining & Welding, we specialize in doing the hard work that no one else wants or can handle. With our 63,000 square foot state-of-the-art facility, housing 53 CNC mills and lathes of assorted sizes, we are equipped to tackle even the most complex and demanding projects. Our staff performs inspections of every project along the way, from the beginning stages of development to completion, and our commitment to excellence and precision sets us apart in the machining industry.

In addition to CNC machining, turning and gun drilling, we also offer prototyping, CMM evaluation of obsolete parts, product management services, full production manufacturing, small batch production, quality testing and shipping services for our clients.

**1. Build-to-Design** - Snoe, Inc. builds any product to the specifications of the client.

2. **Prototyping** - Using a blueprint of your component, and working with your engineers, we will build a model for close inspection and proof of concept. This allows you to make improvements in the component before the start of production.
3. **CMM Evaluation of Obsolete Parts**- We will conduct a CMM evaluation of your equipment.
4. **Product Management Services** - Our knowledgeable team oversees each machined component from the receipt of materials to completion. We provide a one-stop-shop, from material procurement through product manufacturing, packaging and shipping.
5. **Full Production Manufacturing** - From receipt of the client's design to shipment of the final product, we handle all phases of the production process to produce the highest quality of machined work.
6. **Small Batch Production** - Small batches of machined parts or components can be produced to our clients' specifications.
7. **Quality Testing** - Our quality program is based on the standards of AS9100D and supported by manual inspection, Magnetic Particle Inspection, Hydrostatic testing and verification with CMM.
8. **Shipping and Logistics** - With an in-house internationally certified pallet shop, we will package and crate your products, and our in-house fleet of delivery trucks ensures on-time delivery.
9. **Milling, Turning and Gun Drilling** - We can handle projects ranging from small to large (up to 30,000 pounds) for custom milling, turning and gun drilling.
